

THE NUTRITION YOU KNOW. THE EXPERTISE YOU NEED.

When your crop is hungry for K, feed it K-Leaf® Versa, powered by ENC® Formulation Technology to enhance nutrient uptake for higher-yielding plants.

K-LEAF®
VERSA

K-Leaf Versa is a foliar nutritional that provides a necessary requirement for stronger, higher yielding crops by combining the most complete source of foliar potassium with **ENC Formulation Technology**. In addition to meeting K needs at critical growth stages, K-Leaf Versa also contains chelated micronutrients to supplement your current fertility program.

K-Leaf Versa contains ENC Formulation Technology to enhance nutrient uptake and minimize spray application problems. With superior plant safety and the flexibility to address nutritional needs in season, you can be confident in your investment.

Provide your crop with a highly concentrated source of 29% K, plus added micronutrients for increased strength and higher yields. Contact your local Helena representative or authorized dealer for more information about K-Leaf Versa.

PRODUCT HIGHLIGHTS

- **Meets potassium needs at critical growth stages**
- **Added micronutrients supplement fertility programs**
- **Superior plant safety**
- **Labeled for multi-plant use**
- **Contains ENC Formulation Technology:**
 - Enhances nutrient uptake to help correct plant nutrient deficiencies
 - Stronger, more productive plant with higher yield potential
 - Enhances tank mix compatibility
